

ESTELINA'S SPA PRODUCTS

CALLUS REMOVAL TREATMENT

Examine feet for extra dryness and calluses. For best results, file these areas while the feet are still dry. Next, apply our **Intensive heel & foot SCRUB Therapy** to the bottom of both feet and massage into skin to exfoliate. For better results, follow with the use of our **Spa Mineral Sea Salts** to soak feet.

Remove feet from water, dry them well and apply our **EZ-OFF Callus Remover** to soften and remove calluses. Then place the feet in a plastic bag to help the product absorb faster. (**EZ-OFF** can also be used to help with ingrown toenails.) After 10 minutes, remove the bag and file the bottom of the feet again. In extreme cases, you can immediately repeat this application of **EZ-OFF**. Continue with your usual pedicure procedures.

When finished with the pedicure, remove feet from water, dry them well and apply our **Intensive heel & hand CREAM Therapy** for an enjoyably relaxing massage.

Note: For best results, use as an in-home treatment by using both products three times per week and by applying the cream nightly.
